Setup

Login into Joomla administration and **register OpenKM Joomla explorer** extension.

The screenshot shows the Joomla! administrator interface for installing an extension. The top navigation bar includes 'System', 'Users', 'Menus', 'Content', 'Components', 'Extensions', and 'Help'. The main heading is 'Extensions: Install'. The sidebar on the left lists various management options, with 'Install' selected. The main content area is titled 'Upload & Install Joomla Extension' and features three tabs: 'Install from Web', 'Upload Package File', and 'Install from Folder'. The 'Upload Package File' tab is active. Below the tabs, there is a form with the label 'Extension package file' and a text input field containing 'Examinar... com_openkm-sdk2-v2.0'. A blue 'Upload & Install' button is positioned below the input field.

Click on the **Upload & Install** button. When installed will be shown in the components menu with the name of **OpenKM**.

The screenshot shows the Joomla! administrator interface. At the top, there is a navigation bar with menu items: System, Users, Menus, Content, Components, Extensions, and Help. A dropdown menu is open for the 'Components' menu, listing various component categories: Banners, Contacts, Joomla! Update, Messaging, News Feeds, OpenKM (highlighted with a red box), Post-installation Messages, Redirect, Search, Smart Search, and Tags. On the left side, there is a sidebar menu with options: Install (selected), Update, Manage, Discover, Database, Warnings, Install Languages, and Update Sites. The main content area displays a 'Message' box about component installation, followed by the 'OpenKM file browser' section with buttons for 'Install from Web' and 'Upload'. Below this is the 'Upload & Install Joomla! Component' section, which includes a text input for the 'Extension package file', an 'Examinar...' button, and an 'Upload & Install' button. At the bottom of the page, there is a status bar showing 'View Site', '0 Visitors', '1 Administrator', and 'Log out'.

User guide

Configuration

Click on the **OpenKM** option in the Components menu.

Add the **new OpenKM connection**.

Show entries

Name	User	URL	Path	Access
Nothing found - sorry				

Showing 0 to 0 of 0 entries

Create a new OpenKM connection

Access Configuration

- OpenKM user credentials.
- Set public or private access (in case private you should set a password).
- Activate component logs tracking.

The screenshot shows the Joomla Explorer interface for configuring OpenKM. At the top, there is a navigation menu with items: System, Users, Menus, Content, Components, Extensions, and Help. Below this is a dark blue header with the OpenKM logo and name. The main content area has three tabs: 'Access Configuration' (selected), 'Setting the Table', and 'Metadata'. The 'Access Configuration' tab contains the following fields:

- Name:** Extranet
- User:** extranet
- Password:** [masked with dots]
- URL:** http://localhost:8180/OpenKM
- Path:** /okm:root
- Access Level:** Private
- Access Password:** [masked with dots]
- Logs:** Enable Disable

Setting the table

- Configure visible columns.
- Set the number of records shown in the table.

The screenshot shows the Joomla Explorer interface with the OpenKM extension. The top navigation bar includes System, Users, Menus, Content, Components, Extensions, and Help. Below this is the OpenKM logo. The main content area has three tabs: Access Configuration, Setting the Table, and Metadata. The Metadata tab is active, showing a configuration panel with the following options:

- Show Field:** A row of five checkboxes. The first two, labeled 'Icon Size' and 'Update Date', are checked. The last three, 'Author' and 'Version', are unchecked.
- Show in table:** A dropdown menu currently set to '10'.
- Registries:** A label positioned to the right of the dropdown menu.

Metadata

Metadata tab allows to show metadata fields from documents and folders. Add the property group name - metadata name - and the title text to be shown in the table.

The screenshot shows the Joomla Explorer interface. At the top, there is a navigation menu with items: System, Users, Menus, Content, Components, Extensions, and Help. Below this is a dark blue header with the OpenKM logo and name. The main content area has three tabs: Access Configuration, Setting the Table, and Metadata. The Metadata tab is active. Under the Metadata tab, there is a section titled "New Property" with three rows of input fields. Each row has a "Property:" label, a text input field, a "The name of the column in table:" label, and another text input field. The first row has "okp:consulting.name" in the first field and "Name" in the second. The second row has "okp:consulting.language" in the first field and "Language" in the second. The third row has empty fields.

Test connection

Click on the **Test** button to check the OpenKM connection.

Add menu OpenKM file browser

- Go to Joomla menu administration.
- Add a new menu.

Select the OpenKM file browser menu type.

The screenshot displays the Joomla! administrator interface. At the top, a navigation menu includes 'System', 'Users', 'Menus', 'Content', 'Components', 'Extensions', and 'Help'. Below this, a sidebar on the left shows 'Menu Item Type' selected. The main content area is titled 'Menu Item Type' and lists several options: 'Articles', 'Configuration Manager', 'Contacts', 'News Feeds', 'OpenKM', and 'Search'. The 'OpenKM' option is highlighted with a red rectangular border. Within this highlighted area, the text 'OpenKM file browser OpenKM file browser' is visible, with a red arrow pointing to the second instance of the text.

Set the menu title, go to configuration parameters and select from the list the OpenKM configuration to be shown in this menu option.

UI Translation

Translate Joomla explorer to another language is so easy simply must create four files:

The current English translation is located at:

Administrator

```
/administrator/language/en-GB/en-GB.com_openkm.ini  
/administrator/language/en-GB/en-GB.com_openkm.sys.ini
```

Site

```
/language/en-GB/en-GB.com_openkm.ini  
/language/en-GB/en-GB.com_openkm.sys.ini
```

To add a new translation, for example, France should create:

Administrator

```
/administrator/language/fr-FR/fr-FR.com_openkm.ini  
/administrator/language/fr-FR/fr-FR.com_openkm.sys.ini
```

Site

```
/language/fr-FR/fr-FR.com_openkm.ini  
/language/fr-FR/fr-FR.com_openkm.sys.ini
```

Changelog

Version Professional

v2.0.9

- Feature
 - Support sdk4php-2.5.1
- Bug
 - Resolved to show metadata because of sdk4php in the PropertyGroupImpl class

v2.0.8

- Feature
 - Support sdk4php-2.5.0

v2.0.7

- Feature
 - Support sdk4php-2.0.4
- Bug
 - Refactoring Code and deleting files that are not necessary

v2.0.x

- Feature
 - Support sdk4php-2.3.0
 - Support for metadata
 - Logs

Version Community

v2.0.9

- Feature
 - Support sdk4php-1.1.3
- Change
 - Update the searches because the sdk4php-1.1.3 changed the result it returns
- Bug
 - Resolved to show metadata because of sdk4php in the PropertyGroupImpl class

v2.0.8

- Feature
 - Support sdk4php-1.1.2

v2.0.7

- Feature
 - Support sdk4php-1.1.1
- Bug
 - Refactoring Code and deleting files that are not necessary

v2.0.x

- Feature
 - Support sdk4php-1.1.0
 - Support for metadata
 - Logs
