Digital Signature Tool 2.x compatibility

Digital Signature tool version	OpenKM Compatibility		Status
	Professional	Community	
2.4	Version 6.4.45 and uppter.	Not compatible.	Active.
2.3	Version 6.4.31 to 6.4.44.	Not compatible.	Deprecated.
2.2	Version 6.4.31 to 6.4.44.	Not compatible.	Deprecated.
2.1	Version 6.4.31 to 6.4.44.	Not compatible.	Deprecated.
2.0	Version 6.4.26 to 6.4.44.	Not compatible.	Deprecated.

Digital Signature Tool 1.x compatibility

Digital Signature tool version	OpenKM Compatibility		Status
	Professional	Community	
1.0.2	Version 6.4.25 to 6.4.26.	Version 6.3.2 and upper.	Active

1.0.1	Version 6.4.1 to 6.4.25.	Version 6.3.2 and upper.	Deprecated
-------	--------------------------	--------------------------	------------

Download

- OpenKM Digital Signature tool 2.4 available at OpenKM download center.
- OpenKM Digital Signature tool 2.3 available at OpenKM download center.
- OpenKM Digital Signature tool 2.2 available at OpenKM download center.
- OpenKM Digital Signature tool 2.1 available at OpenKM download center.
- OpenKM Digital Signature tool 2.0 available at OpenKM download center.
- [OpenKM Digital Signature tool 1.0.2](#)

Requirements

Before running the application be sure you get installed Visual C++ Redistributable for Visual Studio.

- .NET 4.0: Visual C++ Redistributable for Visual Studio 2012 ([x86 or x64](#)) (Recommended).
- .NET 2.0: Visual C++ Redistributable for Visual Studio 2008 ([x86](#) or [x64](#)).

User guide version 2.x

Digital Signature Clients allows signing - electronic digital signature - documents to OpenKM.

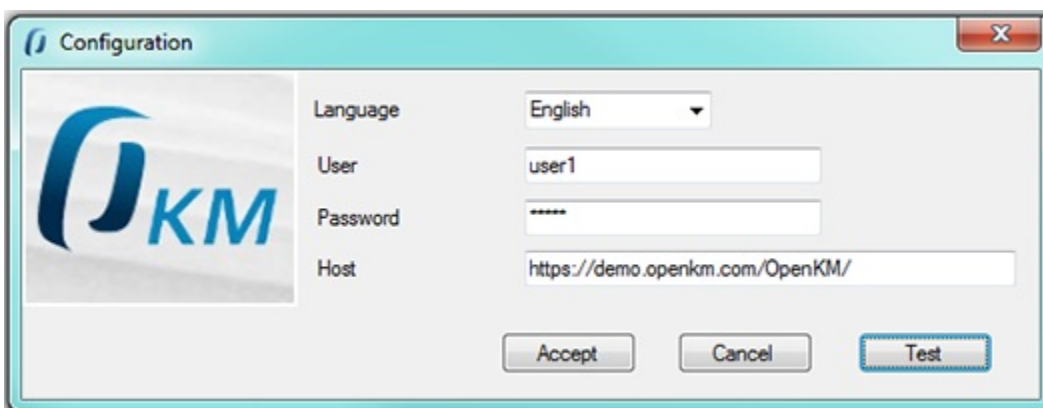

Configuration

Choose **File / Configuration** menu option to show the configuration popup.

Configuration parameters available are:

- User interface language.
- User and password to connect.
- The OpenKM server host.

To accept configuration parameters changes, click **Accept** button.

Sign and upload documents

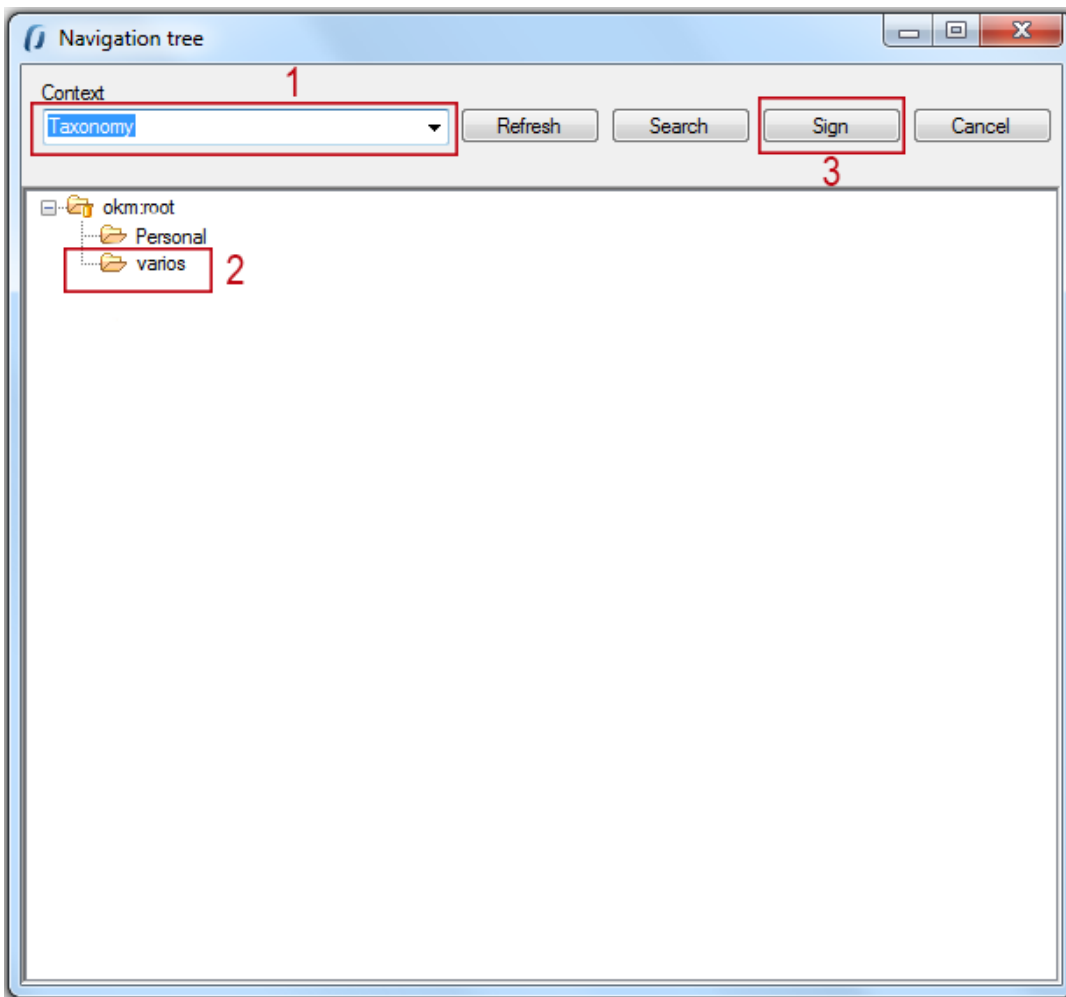

To sign documents, **select some files or folders with files into and drag** to Digital Signature Client.

Will be shown a popup to **choose the certificate** what will be used to sign documents. **Choose a certificate** and click **Accept** button.

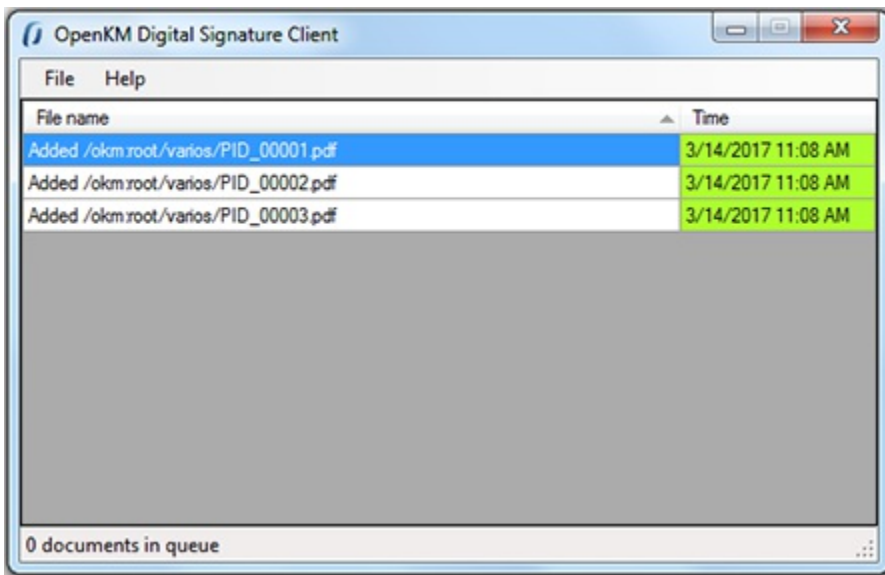

Finally, will be shown a navigator popup to **select documents folder destination**. **Select a folder with write access** (for your user) and click **Sign** button.

When Digital Signature Client detects an existing document with the same name into OpenKM is prompt a popup to choose one of these two options, updated the file or skip it.

Information about signing and uploading process is shown in Digital Signature Client main table.

Sign documents within OpenKM

Choose **File / Search** menu option to show the search popup.

Select the document and click **Sign** button.

i If you want to change the signature certificate click Yes button.

Information about signing process is shown in Digital Signature Client table.

Log

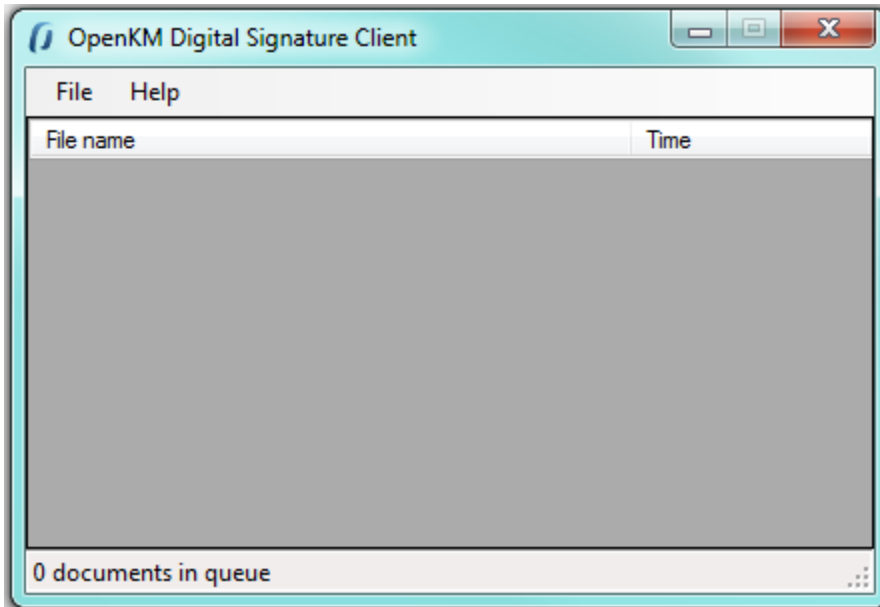

In **My Documents/OpenKM** there's a file log called DigitalSignature.log with a complete log trace.

User guide version 1.x

Digital Signature Clients allows signing - electronic digital signature - documents to OpenKM.

Configuration

Choose **File / Configuration** menu option to show the configuration popup.

Configuration parameters available are:

- OpenKM version which client connects to.
- User interface language
- User and password to connect
- The OpenKM server host

To accept configuration parameters changes, click **Accept** button.

Sign and upload documents

To sign documents, **select some files or folders with files into and drag** to Digital Signature Client.

Will be shown a popup to **choose the certificate** what will be used to sign documents. **Choose a certificate** and click **Accept** button.

Finally, will be shown a navigator popup to **select documents folder destination**. **Select a folder with write access** (for your user) and click **Sign** button.

When Digital Signature Client detects an existing document with the same name into OpenKM is prompt a popup to choose one of these two options, updated the file or skip it.

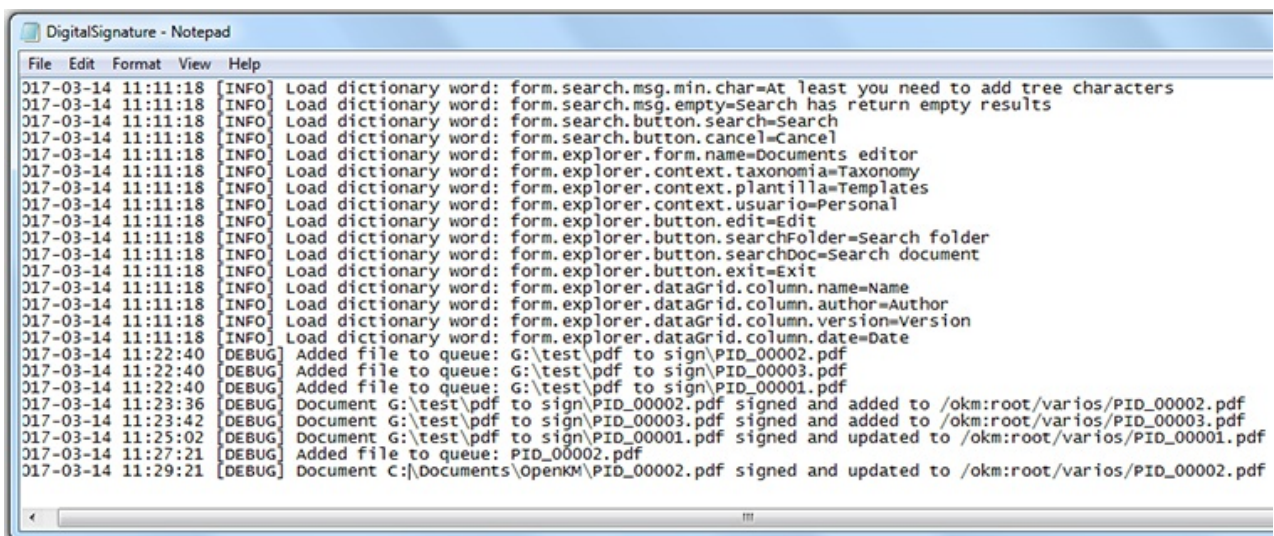

Information about signing and uploading process is shown in Digital Signature Client main table.

Log

In **My Documents/OpenKM** there's a file log called `DigitalSignature.log` with a complete log trace.

Change log of version 2.x

Digital Signature Tool 2.x

v 2.3

- Released 2017-10-04
- Explorer Form:
 - Add signature icon to a new table column.
- Bug:
 - Mark the document as signed when uploading or editing a document.

v 2.2

- Released 2017-09-18
- Server Configuration:
 - Improve the portion of how translations are loaded.
- Main form:
 - Change of images and main icon.

v 2.1

- Released 2016-10-28
- File Menu:
 - Add functionality to sign documents within OpenKM.

v 2.0

- Released 2016-05-02.
- Server Configuration:
 - Implements OKMRest (Remove field OpenKM Version)

Language pack

The application can work with several languages, here are set the languages terms definitions.

Sometimes translations are not fully completed and some terms are missing. The "en-GB" is used to identify which are the missing terms and how many are.

When a term is missing in other language the "en-GB" term is used in its place.

en-GB translation can not be removed.

form.explorer.dataGrid.column.date=Fecha
```

Create a new language

Language translations are displayed with the following structure.

To **create** a file with a new **language**, follow these steps:

1. Creates a new text document named **OKMDigitalSignature-xxXX** with the **.properties** extension, where **xxXX** refers to the **language identifier** (ISO 639).

For example in the case of the Spanish language it would be esES (in English is enGB), that means file must be named **OKMDigitalSignature-esES.properties**.

More information about [ISO 639](#).

- Copy into the file created the example of the top of the Spanish translation. Each line of text it have sections, the " **Key property**" and "**Traslation value**". The first one should not be changed and the second it refers to translated text and is what you should changed.

For example:

```
# Configuration form
form.configuration.name=Configuration
form.configuration.language=Language
form.configuration.version=OpenKM Version
...
```

Replace by:

```
# Configuration form
form.configuration.name=Configuración
form.configuration.language=Idioma
form.configuration.version=OpenKM Versión
...
```

- Save the file into **OpenKM folder**, located in my documents.
