Change log of version 3.x

Digital Signature Tool 3.x

v3.6

- Released 2020-04-17
- Update OKMRest version 3.7.0 (compatible with OpenKM version 7.1.11 and upper)

v3.5

- Released 2020-02-18
- Update OKMRest version 3.6.0 (compatible with OpenKM version 7.1.9 and upper)

v3.4

- Released 2019-11-25
- Update OKMRest version 3.5.0.

v3.3

- Released 2019-04-05
- Bugs
- Validation of the host URL for methods using System.Net.Http in the SDK to .net.

v3.2

- Released 2019-02-11
- Update OKMRest version 3.1:
 - Replacement of objects with the name "XXXList", by lists directly (List<T>).

v3.1

- Released 2019-01-24
- Allow select multiple in metadata fields.
- Authentication by Token.

Change log of version 2.x

Digital Signature Tool 2.x

v 2.4.2

- Released 2019-04-09
- Bugs
 - Validation of the host URL for methods using System.Net.Http in the SDK to .net.

v 2.4.1

- Released 2018-11-16
- Updated tools:
 - Net Framework 4.5.2
- Bug SDK:
 - Upload, download and update large files. Affected methods: createDocumetSimple, getContent and check-in.

v 2.4

- Released 2018-09-14
- Update:
 - OKMRest version 2.6.0

v 2.3

- Released 2017-10-04
- Explorer Form:
 - Add a signature icon to a new table column.
- Bug:
- Mark the document assigned when uploading or editing a document.

v 2.2

- Released 2017-09-18
- Server Configuration:
 - Improve the portion of how translations are loaded.
- Main form:
 - Change of images and the main icon.

v 2.1

Created in 2016 by OpenKM. OpenKM documentation is provided under OpenKM documentation license.

- Released 2016-10-28
- File Menu:
 - Add functionality to sign documents within OpenKM.

v 2.0

- Released 2016-05-02.
- Server Configuration:
 - Implements OKMRest (Remove field OpenKM Version)

Change log of version 1.x

Digital Signature Tool 1.x

v 1.1.0

- Released 2018-11-15
- Updated tools:
 - Net Framework 4.5.2
 - Use Rest Service
- Bug SDK:
 - Upload, download and update large files. Affected methods: createDocumetSimple, getContent and check-in.

Language pack

The application can work with several languages, there are set the languages terms definitions.

Sometimes translations are not fully completed and some terms are missing. The "en-GB" is used to identify which are the missing terms and how many are.

When a term is missing in other languages the "en-GB" term is used in its place.

en-GB translation cannot be removed.

Create a new language

Language translations are displayed with the following structure.

|--|

To create a file with a new language, follow these steps:

1. Creates a new text document named OKMDigitalSignature-xxXX with the .properties extension, where xxXX refers

to the language identifier (ISO 639).

Created in 2016 by OpenKM. OpenKM documentation is provided under OpenKM documentation license.

For example in the case of the Spanish language, it would be esES (in English is enGB), that means the file must be

named **OKMDigitalSignature-esES.properties.**

2. Copy into the file created the example of the top of the Spanish translation. Each line of text it has sections, the "Key

property" and "**Translation value**". The first one should not be changed and the second it refers to translated text and is what you should change.

For example:

```
# Configuration form
form.configuration.name=Configuration
form.configuration.language=Language
form.configuration.version=OpenKM Version
...
```

Replace by:

```
# Configuration form
form.configuration.name=Configuration
form.configuration.language=Idioma
form.configuration.version=OpenKM Versión
...
```

3. Save the file into the installation folder, located in: "C:\Program Files (x86)\OpenKM\OpenKM Digital Signature

Client\" or the path you selected for installation.
