## User guide version 7.1.x

#### **Oulook Add-in**

Outlook Add-in 7.1.x enables users to select several emails and import content and attachments to OpenKM.

Importing mail creates a folder structure based on received email date ( year/month/day folder structure ) and imports into the mail content OpenKM mail tab view.

#### Word Add-in

Word Add-in 7.1.x enables users to upload new files and edit existing OpenKM files.

When a user uploads new files, he browses across the OpenKM tree view to select where he wants to upload the file.

The OpenKM Word Add-in detects if the document opened by a user is an OpenKM file and enables or disables some toolbar options.

#### **Excel Add-in**

Excel Add-in 7.1.x enables users to upload new files and edit existing OpenKM files.

When a user uploads new files, he browses across the OpenKM tree view to select where he wants to upload the file.

The OpenKM Excel Add-in detects if the document opened by a user is an OpenKM file and enables or disables some toolbar options.

#### **PowerPoint Add-in**

PowerPoint Add-in 7.1.x enables users to upload new files and edit existing OpenKM files.

When a user uploads new files, he browses across the OpenKM tree view to select where he wants to upload the file.

The OpenKM PowerPoint Add-in detects if the document opened by a user is an OpenKM file and enables or disables some toolbar options.

#### Visio Add-in

<u>Visio Add-in 7.1.x</u> enables users to upload new files and edit existing OpenKM files.

When a user uploads new files, he browses across the OpenKM tree view to select where he wants to upload the file.

The OpenKM Visio Add-in detects if the document opened by a user is an OpenKM file and enables or disables some toolbar options.

Created in 2016 by OpenKM. OpenKM documentation is provided under OpenKM documentation license.

### Access Add-in

<u>Access Add-in 7.1.x</u> allows users to upload new files to OpenKM.

When a user uploads new files, he browses across the OpenKM tree view to select where he wants to upload the file.

The OpenKM Access Add-in will be visible once a database is opened.

#### **Project Add-in**

Project Add-in 7.1.x enables users to upload new files and edit existing OpenKM files.

When a user uploads new files, he browses across the OpenKM tree view to select where he wants to upload the file.

The OpenKM Project Add-in detects if the document opened by a user is an OpenKM file and enables or disables some toolbar options.

# Outlook Add-in 7.1.x

• Outlook addin enables users to select several emails and import them into OpenKM among other actions.

After installing the Outlook add-in, a new menu item "OpenKM" will appear in Outlook.

	Configuration	🔒 Import	Import only attachments	🕢 Help	-
--	---------------	----------	-------------------------	--------	---

Detail of the functions according to their icons:

Button	Action
٨	Addin configuration.
	Import mail.
I	Import only attachments.
Θ	Help.

#### **Configure OpenKM Add-In**

First, you must select the **Configuration** menu item to set your configuration values to access OpenKM from the client computer.

Property	Туре	Description
Language	Select	Ms Addin user interface language.
User	String	User id for accessing OpenKM. okmAdmin
Password	String	The password of the user.
Attachment path	String	OpenKM path where will be stored the intercepted attachment when the user is sending an email.

Page	12	of	127
------	----	----	-----

Add metadata	Bool	To enable/disable metadata selection form.
Intercept attachment	Select	<ul> <li>Choose the behaviour when the user send an email with attachments.</li> <li>Never do anything</li> <li>Ask if you want to intercept and import into OpenKM.</li> <li>Always intercept and import into OpenKM.</li> </ul>
		When OpenKM intercepts an attachment, it is imported to OpenKM and replaced into the sent email by and OpenKM URL of the document ( attachment imported ).
Enable attachment	Checkbox	Enable or disable activity log of intercepted attachments.
log		This feature is only available when OpenKM is working with MySQL or MariaDB database.

When you set your configuration values, a folder called **OpenKM** is created in your user **My documents folder**.

In this OpenKM folder, a configuration file named **openkm.xml** and another file named **document.xml** are created. The OpenKM Add-in uses to store some document editing information. You should not edit or delete these files.

#### Importing emails to OpenKM

The user can import emails from Outlook to OpenKM in three ways:

- 1. Select the option "Import" in the OpenKM toolbar.
- 2. Dragging the mail to a folder inside the OpenKM navigator tree in the left panel.
- 3. Right click on the mail and choose the option "import" inside the menu OpenKM.

In cases one and three then you must select the destination path to import the mail.

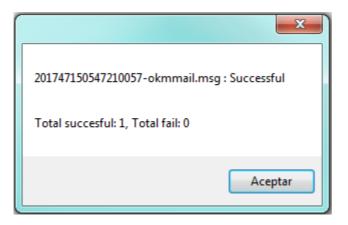

When **grouped checkbox is checked** will be **added** at the end of the path the subfolder **Year/Month/Day**.

That means if you have choosen destination path "/**okm:root/email**" and grouped checkbox is checked the destination path will be "/**okm:root/email/2017/03/24**" ( sample based in actual date value as " **2017/03/24**" ).

After importing is finished, a message indicating the number of emails and attachments imported will be displayed.

If you have activated the option "Add metadata" in the configuration, it will allow you to select and fill in the corresponding data.
 In the case of having multiple selection metadata to mark and unmark all options, you can use the key combination "Ctrl" + "E" and "Supr" respectively.

### Importing attachments to OpenKM

The user can import attachments from Outlook to OpenKM in two ways:

To import attachments, first select one email.

- 1. Select the option "Import only attachments" in the OpenKM toolbar.
- 2. Right click on the mail and choose the option to "Import only attachments" inside the menu OpenKM.

# Word Add-in 7.1.x

Word Add-in enables users to upload new files and edit existing OpenKM files.

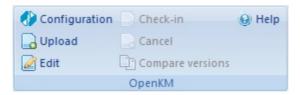

When a user uploads new files, he browses across the OpenKM tree view to select where he wants to upload the file.

The OpenKM Word Add-in detects if the document opened by a user is an OpenKM file and enables or disables some toolbar options.

Office Add-ins are compatible from version 2000 to version 2019.

After installing the Outlook add-in, a new menu item "OpenKM" will appear in Outlook.

Detail of the functions according to their icons:

Button	Action
۲	Addin configuration.
	Add new document
	Document edit ( check-out )
	Upload modified document (check-in)
	Cancel document edit
Đ	Compare versions
0	Help

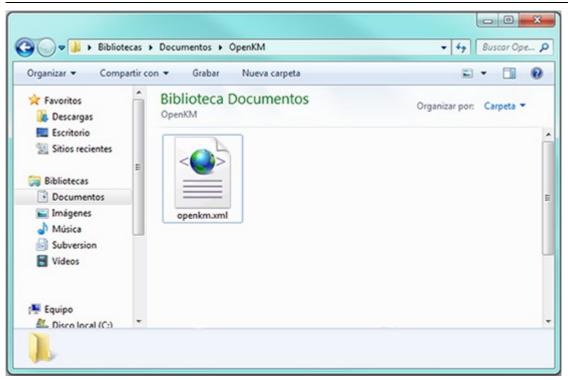

## **Configure OpenKM Add-In**

Created in 2016 by OpenKM. OpenKM documentation is provided under OpenKM documentation license.

First, you must choose the **Configuration** menu item to set your configuration values to access OpenKM from the client computer.

Property	Туре	Description
Language	Select	Ms Addin user interface language.
User	String	User id for accessing OpenKM.
Password	String	The password of the user.
Host	String	OpenKM url. https://demo.openkm.com/OpenKM/
Add metadata	Bool	To enable/disable metadata selection form.

After you set your configuration values, a folder called **OpenKM** is created in your user **My documents folder**. In this OpenKM folder, a configuration file called **openkm.xml** and another file called **document.xml** are created that the OpenKM Add-in uses to store some document editing information. You should not edit or delete these files.

## Uploading a new file

Click on the add new document button, a folder tree view will be shown. You must select the folder where you want to upload the file.

Page 24 of 127

() Navigation tree		
Context Taxonomy	Refresh     Search	Upload Cancel
e-Contract C		

Click on the **Send** Button and after that, the document will be uploaded to OpenKM and a notification message will be shown.

×
Document has been send successfuly
Aceptar

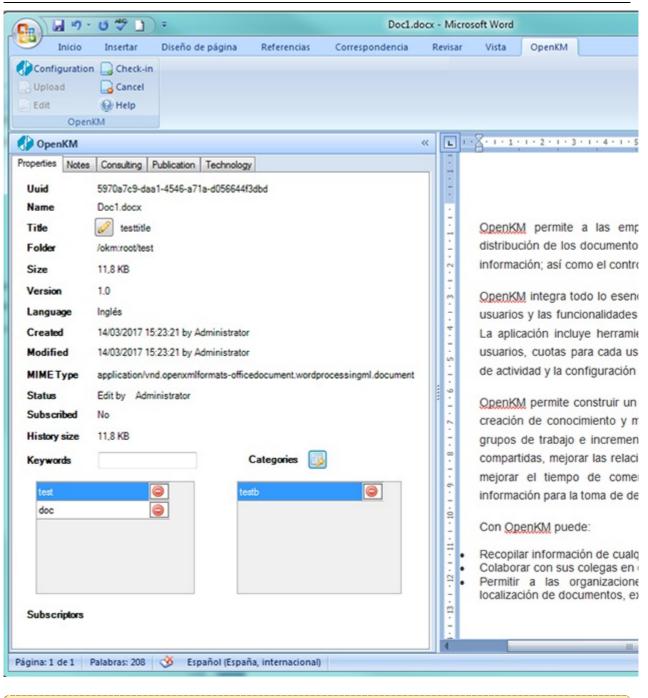

If you have activated the option "Add metadata" in the configuration, it will allow you to select and fill in the corresponding data.
 In the case of having multiple selection metadata to mark and unmark all options, you can use the key combination "Ctrl" + "E" and "Supr" respectively.

## Editing an OpenKM document

Clicking on the *clicking* document edit button, a folder navigator will be shown. You must navigate across folders and select a document that you want to edit.

Taxonomy -	Search folder	Search document	Edit
e with the second		Name	Author
<mark>/a</mark> n 2016 <del>/∂→</del> test	► E	Doc1.docx	okmAdmin
	2	Doc2.docx	okmAdmin
	J. J	OKMPdf-000002.pdf	okmAdmin

When you've got some OpenKM document opened, the **Upload modified document** (check-in) and **Cancel document edit** toolbar options will be enabled.

In the left panel, you can view the properties, notes, relations, and metadata of the document.

## User guide version 6.2.x

#### **Oulook Add-in**

Outlook Add-in enables users to select several emails and import content and attachments to OpenKM.

Importing mail creates a folder structure based on received email date ( year/month/day folder structure ) and imports into the mail content OpenKM mail tab view.

#### Word Add-in

Word Add-in enables users to upload new files and edit existing OpenKM files.

When a user uploads new files, he browses across the OpenKM tree view to select where he wants to upload the file.

The OpenKM Word Add-in detects if the document opened by a user is an OpenKM file and enables or disables some toolbar options.

#### **Excel Add-in**

Excel Add-in enables users to upload new files and edit existing OpenKM files.

When a user uploads new files, he browses across the OpenKM tree view to select where he wants to upload the file.

The OpenKM Excel Add-in detects if the document opened by a user is an OpenKM file and enables or disables some toolbar options.

#### **PowerPoint Add-in**

PowerPoint Add-in enables users to upload new files and edit existing OpenKM files.

When a user uploads new files, he browses across the OpenKM tree view to select where he wants to upload the file.

The OpenKM PowerPoint Add-in detects if the document opened by a user is an OpenKM file and enables or disables some toolbar options.

#### Visio Add-in

Visio Add-in enables users to upload new files and edit existing OpenKM files.

When a user uploads new files, he browses across the OpenKM tree view to select where he wants to upload the file.

The OpenKM Visio Add-in detects if the document opened by a user is an OpenKM file and enables or disables some toolbar options.

### Access Add-in

Access Add-in allows users to upload new files to OpenKM.

When a user uploads new files, he browses across the OpenKM tree view to select where he wants to upload the file.

The OpenKM Access Add-in will be visible once a database is opened.

### **Project Add-in**

Project Add-in enables users to upload new files and edit existing OpenKM files.

When a user uploads new files, he browses across the OpenKM tree view to select where he wants to upload the file.

The OpenKM Project Add-in detects if the document opened by a user is an OpenKM file and enables or disables some toolbar options.

# Outlook Add-in

• Outlook addin enables users to select several emails and import them into OpenKM among other actions.

After installing the Outlook add-in, a new menu item "OpenKM" will appear in Outlook.

# Word Add-in

Word Add-in enables users to upload new files and edit existing OpenKM files.

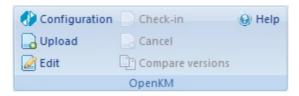

When a user uploads new files, he browses across the OpenKM tree view to select where he wants to upload the file.

The OpenKM Word Add-in detects if the document opened by a user is an OpenKM file and enables or disables some toolbar options.

Office Add-ins are compatible from version 2000 to version 2019.

After installing the Outlook add-in, a new menu item "OpenKM" will appear in Outlook.

Detail of the functions according to their icons:

Button	Action
۲	Addin configuration.
	Add new document
	Document edit ( check-out )
	Upload modified document (check-in)
	Cancel document edit

0	Help

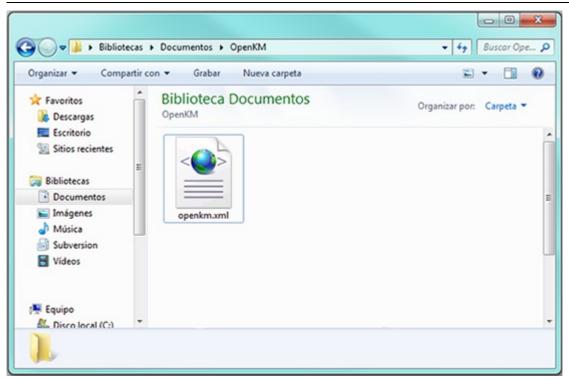

### **Configure OpenKM Add-In**

Created in 2016 by OpenKM. OpenKM documentation is provided under OpenKM documentation license.

First, you must choose the **Configuration** menu item to set your configuration values to access OpenKM from the client computer.

Property	Туре	Description
Language	Select	Ms Addin user interface language.
User	String	User id for accessing OpenKM.
Password	String	The password of the user.
Host	String	OpenKM url. https://demo.openkm.com/OpenKM/
Add metadata	Bool	To enable/disable metadata selection form.

After you set your configuration values, a folder called **OpenKM** is created in your user **My documents folder**. In this OpenKM folder, a configuration file called **openkm.xml** and another file called **document.xml** are created that the OpenKM Add-in uses to store some document editing information. You should not edit or delete these files.

## Uploading a new file

Click on the add new document button, a folder tree view will be shown. You must select the folder where you want to upload the file.

Page 69 of 127

() Navigation tree			x
Context Taxonomy	Refresh Search	Upload Cancel

Test

Created in 2016 by OpenKM. OpenKM documentation is provided under OpenKM documentation license.

After you set your configuration values, a folder called **OpenKM** is created in your user **My documents folder**. In this OpenKM folder, a configuration file called **openkm.xml** and another file called **document.xml** are created that the OpenKM Add-in uses to store some document editing information. You should not edit or delete these files.

## Log

In My Documents/OpenKM there's a file log called PowerPointAddin.log with a complete log trace.

# Change log of version 7.1.x

## Office Add-in Tool 7.1.x

#### v 7.1.9

- Released 2020-06-22.
- Update OKMRest version 3.7.1.
- New add-ins for MSProject and MSAccess.

#### v 7.1.8

- Released 2020-04-17.
- Allows comparing versions of a document with the OKMWordAddin.
- By selecting a document for editing, you can navigate through the **categories** for easier access. (Word, Excel, PowerPoint and Visio)
- Update OKMRest version 3.7.0 (compatible with OpenKM version 7.1.11 and upper)
- Bugs
- Error to import an email whose subject was not defined. (Outlook)
- Error selecting language set from settings.

#### v 7.1.7

- Released 2020-02-18
- Update OKMRest version 3.6.0 (compatible with OpenKM version 7.1.9 and upper)

### v 7.1.6

- Released 2020-02-07
- It works with all versions of Microsoft Office from 2000 to Office 2019.

#### v 7.1.5

- Released 2019-11-25
- Update OKMRest version 3.5.0.

## v 7.1.4

- Released 2019-09-06
- Bugs
- Error adding metadata with OpenKM 7.1.5

### v 7.1.3

Created in 2016 by OpenKM. OpenKM documentation is provided under OpenKM documentation license.

- Released 2019-04-05
- Allows uploading documents, linked to the OneDrive account, to the OpenKM repository.
- Bugs
  - Validation of the host URL for methods using System.Net.Http in the SDK to .net.

## v 7.1.2

- Released 2019-02-11
- Update OKMRest version 3.1:
  - Replacement of objects with the name "XXXList", by lists directly (List<T>).

### v 7.1.1

- Released 2019-01-24
- Allow select multiple in metadata fields.
- Authentication by Token.

# Change log of version 6.2.x

## Office Add-in Tool 6.2.x

#### v 6.2.12

- Released 2020-06-22
- Update **OKMRest version 2.7.0** (compatible with OpenKM version 6.4.52 and upper)
- New add-ins for **MSProject** and **MSAccess**.

#### v 6.2.11

- Released 2020-04-17.
- Allows comparing versions of a document with the OKMWordAddin.
- By selecting a document for editing, you can navigate through the **categories** for easier access. (Word, Excel, PowerPoint and Visio)
- Update OKMRest version 2.6.3 (compatible with OpenKM version 6.4.45 and upper)
- Bugs
- Error to import an email whose subject was not defined. (Outlook)
- Error selecting language set from settings.

#### v 6.2.10

- Released 2020-02-07
- It works with all versions of Microsoft Office from 2000 to Office 2019.

#### v 6.2.9

- Released 2019-04-09
- Allows uploading documents, linked to the OneDrive account, to the OpenKM repository.
- Bugs
- Validation of the host URL for methods using System.Net.Http in the SDK to .net.

#### v 6.2.8

- Released 2018-12-21
- Allow select multiple in metadata fields.

#### v 6.2.7

- Released 2018-11-16
- Implementation of WIX installers, to install the add-in for "Everyone" or "Just me".

#### • Updated tools:

- Net Framework 4.5.2
- AddIn Express version 9.1.4620
- Bug SDK:
  - Upload, download and update large files. Affected methods: createDocumetSimple, getContent and check-in.

#### v 6.2.6

- Released 2018-09-14
- Update:
  - OKMRest version 2.6.0

### v 6.2.5

- Released 2018-07-17.
- Word Add-in:
  - Allow you to manage the relations of the document ( Bidirectional, Parent-Child and Group Relations ).

#### v 6.2.4

- Released 2017-12-16.
- Customization:
  - The text "OpenKM" what is shown by default in the main tab, now can be replaced by your own.

#### v 6.2.3

- Released 2017-09-20.
- Visio Add-in:
  - Implementation for Microsoft Visio.
- Outlook Add-in:
  - Allows you to add mail attachments from OpenKM when you send new emails.
  - Allows creating, editing and deleting folders within OpenKM from the contextual menu of the navigator tree.
- Outlook Add-in, Word Add-in, Excel Add-inand Powerpoint Add-in:
  - Allows you to add metadata.
  - AddIn-Express update to version 8.6.4408
  - Improve the portion of how translations are loaded.
- Bug
- Remove method execute a script. (Word Add-in, Excel Add-in and Powerpoint Add-in)
- Refresh explorer from after a check-in.

### v 6.2.2

- Released
- Outlook Add-in:
  - Allow dragging emails to OpenKM tree view panel to import.
  - Allow import only attachments feature to OpenKM.
  - Add options in configuration form:
    - Attachment path and enable attachment log options: Create a log (in an OpenKM table) to audit the file what has been sent.
    - Intercept attachments option: Replace attachments with OpenKM document links.
- Word Add-in:
  - When editing, you can update to a major or minor version of the document.
  - Implementation of the panel to display document properties, notes, and metadata.

#### v 6.2.1

Released

#### v 6.2.0

- Released
- Outlook Add-in, Word Add-in, Excel Add-inand Powerpoint Add-in:
  - Use OKMRest library (remove old SOAP support).

# Troubleshoting

# Enable or disable the OpenKM AddIns toolbar in Microsoft Office.

### For WordAddIn, ExcelAddIn and PowerPointAddIn:

- 1. Click the office button and go to word options.
- 2. A new window will be shown, look for the option complements, select the **Complement COM** option and press the **Go** button.
- 3. Finally **check** the box **OpenKMWord\_AddIn** and press the **OK** button.

Complementos disponibles:	
OpenKMWord_Add-in     Visual Studie Tools for Office Design-Time Adaptor for Word	2 Aceptar Cancelar
	Agregar Quitar
Ubicación: C:\Users\DXD\AppData\Local\OpenKM\OKMWordAddIn\adxk Comportamiento de carga: Cargar al inicio	oader.dll

#### For OutLookAddIn:

- 1. Go to the **Tools menu** and look for the option to **customize**.
- 2. A new window will be shown in what you should select the box of the **commandBarOKM** option and press the **close** button.

## **Uninstall Office Addins**

To **uninstall** OpenKM Office Add In, follow these steps:

- 1. Press the **start** button of windows and look for the **control panel**.
- 2. It will show a window in waht you should choose the option to **uninstall a program**, select the OKMOfficeAddIn you want to remove and press the **uninstall** button.

# Language pack

The application can work with several languages, there are set the languages terms definitions.

Sometimes translations are not fully completed and some terms are missing. The "en-GB" is used to identify which are the missing terms and how many are.
 When a term is missing in other languages the "en-GB" term is used in its place.

en-GB translation cannot be removed.

## **Spanish translation**

### Create a new language

Language translations are displayed with the following structure.

To **create** a file with a new **language**, follow these steps:

1. Creates a new text document named **OKMAddin-xxXX** with the **.properties** extension, where **xxXX** refers to the

language identifier (ISO 639).

For example in the case of the Spanish language, it would be es<br/>ES ( in English is enGB ), that means the file must be  $% \left( {{\left[ {{{\rm{B}}_{\rm{B}}} \right]}_{\rm{B}}} \right)$ 

named OKMAddin-esES.properties.

Copy into the file created the example of the top of the Spanish translation. Each line of text it has sections, the " Key property" and "Translation value". The first one should not be changed and the second it refers to translated text and is what you should change.

For example:

```
# Configuration form
form.configuration.name=Configuration
form.configuration.language=Language
form.configuration.version=OpenKM Version
```

Replace by:

• • •

```
# Configuration form
form.configuration.name=Configuración
form.configuration.language=Idioma
form.configuration.version=OpenKM Versión
...
```

3. Save the file into the **installation folder**, if:

- Installation for "Just me" -> for example "C:\Users\<Name>\AppData\Local\OpenKM".
- Installation for "Everyone" -> for example "C:\Program Files (x86)\OpenKM\OKMWordAddIn"

\_\_\_\_\_

• Or the path you selected for installation.
